EarthPayment (EPT) Whitepaper

Version: 1.0

Document Date: July 2026

---

1. Executive Summary

EarthPayment (EPT) is a blockchain-based digital payment token created to support fast, transparent, and accessible digital transactions. The project's vision is to simplify cryptocurrency payments while building an ecosystem that encourages real-world adoption.

EPT is designed with a fixed supply, transparent token management, and long-term ecosystem development as its core principles.

---

2. Vision

Our vision is to create a payment ecosystem where cryptocurrency can be used easily by individuals and businesses worldwide.

EPT aims to become a practical digital payment asset that supports secure transactions, community participation, and future payment innovations.

---

3. Mission

The mission of EarthPayment is to:

- Build a transparent payment ecosystem.
- Encourage cryptocurrency adoption.
- Develop payment tools and applications.
- Support long-term sustainable growth.
- Maintain a fair and predictable token economy.

---

4. The Problem

Current payment systems often involve:

- High transaction fees.
- Slow international transfers.
- Dependence on centralized institutions.
- Limited accessibility in some regions.

Blockchain technology offers an alternative by enabling secure and borderless digital transactions.

---

5. The Solution

EPT provides:

- Fast blockchain transactions.
- Transparent token supply.
- Low-cost digital payments.
- Future integration with payment applications.
- Community-focused ecosystem growth.

---

6. Token Information

Token Name: EarthPayment

Ticker: EPT

Blockchain: Solana

Token Standard: Token 2022

Maximum Supply: 100,000,000 EPT

The maximum supply is permanently fixed.

After deployment, the mint authority is planned to be revoked so no additional tokens can ever be created.

A transaction fee of 0.05 % will be applied and collected on a separate public account for future use within the project.

Transaction fees are collected into the project's Treasury wallet and are used to support development, ecosystem growth, marketing, liquidity, and community initiatives. The Treasury wallet address may be published through official project channels to ensure transparency.

---

7. Tokenomics

Total Supply

100,000,000 EPT

Reserve

20,000,000 EPT (20%)

Long-term reserve held in publicly disclosed wallets for future ecosystem expansion, partnerships, and strategic opportunities.

User Rewards & Ecosystem

30,000,000 EPT (30%)

Allocated for:

- Community rewards
- Platform incentives
- Marketing campaigns
- Future ecosystem services

Development Team

20,000,000 EPT (20%)

Reserved for:

- Software development
- Payment infrastructure
- Security improvements
- Team incentives

These tokens are intended to follow a long-term vesting schedule.

Liquidity

30,000,000 EPT (30%)

Reserved for:

- Decentralized liquidity pools
- Future centralized exchange listings
- Market liquidity support

Liquidity will be deployed gradually according to ecosystem growth.

---

8. Transparency

Public Wallet Addresses:

QLRLq3xTGvjK5azRjCQfcKajx6dkSivpJx8HBAb2H2E

Reserve - 20 000 000 EPT

HceSmKdJRmLZMyDBhems45HK3DABhn4ygmrVpH5Fo3Yc

Users Rewards & Ecosystem - 30 000 000 EPT

CbQ5mzcUN6jtnPkVB7XZeV8EPemF2D8FL6bzNCu1whAj

Development Team - 20 000 000 EPT

2Y96R26GtEKxGiozrqZW1QHyW3TrKthxXZTwfm7UVLZE

Liquidity - 30 000 000 EPT

Transparency is one of the project's core values.

Public wallet addresses will be published for major allocations whenever appropriate.

The project aims to provide regular updates regarding token distribution and ecosystem development.

---

9. Security

Security is a priority.

The project intends to:

- Protect reserve assets.
- Use secure wallet management.
- Apply blockchain best practices.
- Permanently revoke mint authority after deployment.

---

10. Ecosystem

Future ecosystem components may include:

- Digital payment application
- Merchant payment gateway
- Online payment integrations
- Community reward system
- Partner ecosystem
- Future decentralized applications

Development priorities may evolve over time based on technical progress, user feedback, and available resources.

---

11. Roadmap

Phase 1

- Project creation
- Token deployment
- Website launch
- Whitepaper publication
- Community creation

Phase 2

- Liquidity deployment
- Marketing campaigns
- Wallet integrations
- Partnership development

Phase 3

- Payment application development
- Merchant tools
- User reward programs
- Ecosystem expansion

Phase 4

- Additional payment services
- Global partnerships
- Exchange expansion
- Continuous ecosystem development

---

12. Risk Statement

Cryptocurrencies involve financial and technological risks.

The value of EPT may fluctuate significantly.

Users should conduct their own research before purchasing or using the token.

Nothing in this document constitutes financial, investment, or legal advice.

---

13. Conclusion

EarthPayment seeks to create a transparent, sustainable, and practical payment ecosystem powered by blockchain technology.

The project is committed to responsible token management, long-term development, and building useful payment solutions for the future.

EarthPayment

Connecting the Future of Digital Payments.
